

Del B, Installering og modifisering av Theme:

The screenshot shows the Brackets IDE interface with two code editors open. The left editor displays the file `/Applications/MAMP/htdocs/WU/wp-content/themes/sydney-child/style.css`, which is a child theme of Sydney. The right editor displays the file `/Applications/MAMP/htdocs/WU/wp-content/themes/sydney/style.css`, which is the parent theme. Both files are written in CSS and show various styles for elements like .entry-title, .site-description, .social-menu-widget, and .site-footer.

Her er CSS-en jeg brukte for å modifisere allerede et theme som var laget. Jeg lagde et Child theme for themet Sydney, og kalte det for Sydney Child Theme.

Her er første Slide av siden min, dette slide konseptet lå allerede i Mother themet, det er av denne grunn jeg valgte dette temaet, men det var mange ting som måtte justeres/modifiseres. For eksempel font fargen, slidebakgrunnen, menybaren hadde mange valg. Jeg endret for det meste, tilpasset min interesse, musikk.

Akkurat samme konsept som forrige slide bilde. Bare med annet bilde istedenfor.

Her ser du nedre delen av siden etter å ha passert slidekonseptet. Ikke så mye relevant innhold nå, men jeg endret CSS-en litt her. På Sidebaren har jeg endret på både font fargen og selve bakgrunnsfargen. Hoved endringen i CSS-en er body'en her har jeg endret på bakgrunnet, med et bildet som er relevant til sidens konsept, musikk.
